

Is Cold Laser Therapy Right for You?

Struggling with pain associated with arthritis, fibromyalgia, carpal tunnel syndrome or whiplash? Cold laser therapy and Chiropractic & Rehab Associates could be your answers.

What is cold laser therapy? It is an FDA-approved, low-level light therapy that penetrates up to two inches below the skin's surface causing an increase in cellular function—making it very effective in treating painful and inflamed conditions involving muscle, tendons, ligaments and joints. This treatment is helpful for people suffering neck pain and lower back pain, as well as, wrist, elbow, foot and knee.

Cold laser therapy has been used around the world for over 30 years and in the United States for the last 10. The best part is, it is easily applied, painless, non-invasive and has virtually no side effects.

Chiropractic & Rehab Associates is proud to offer this service at our new location, 45 Sunburst Drive in Hazle Township. Imagine a life without pain and find out what Cold Laser Therapy can do for you! Please call (450-9909) or stop by our office to obtain more information on Cold Laser therapy or our other services including chiropractic care, massage therapy, electrical muscle stimulation and ultrasound therapy.
